| INPUTS                                             | Value       | How it is calculated | Source of the figure   |
|----------------------------------------------------|-------------|----------------------|------------------------|
| Amount invested (transfer value or single premium) |             |                      | Entered by the adviser |
|                                                    | £100,000.00 | entered above        |                        |
| Projected growth rate                              | 5.00%       | entered above        | Entered by the adviser |
| Investment services costs                          | 0.50%       | entered above        | Entered by the adviser |
| Investment product costs                           | 1.19%       | entered above        | Entered by the adviser |
| Adviser costs, initial                             | 3.00%       | entered above        | Entered by the adviser |
| Adviser servicing costs, ongoing                   | 0.25%       | entered above        | Entered by the adviser |

| AGGREGATED COSTS AND CHARGES              | Amount           | % of the amount invested |                                                                                          |
|-------------------------------------------|------------------|--------------------------|------------------------------------------------------------------------------------------|
| Investment services costs                 | £500.00          | 0.50%                    | Quilter RAP-1080 formula                                                                 |
| Investment product costs                  | £1,190.00        | 1.19%                    | Quilter RAP-1080 formula                                                                 |
| Adviser costs, initial                    | £3,000.00        | 3.00%                    | Quilter RAP-1080 formula                                                                 |
| Adviser servicing costs, ongoing          | £238.28          | 0.24%                    | Quilter RAP-1080: servicing is charged on the NET contribution after the initial charges |
| <b>TOTAL first year costs and charges</b> | <b>£4,928.28</b> | <b>4.93%</b>             | <b>The figure the report must disclose in both pounds and percent</b>                    |

| WORKINGS                                   |            |                   |
|--------------------------------------------|------------|-------------------|
| Net contribution after the initial charges | £95,310.00 | C6 - SUM(C14:C16) |
| Growth on the net contribution             | £4,765.50  | C21 * C7          |
| Growth with no charges at all              | £5,000.00  | C6 * C7           |

| FIRST 12 MONTHS                                      | Value           | How it is calculated | Source of the figure                                                                                                                     |
|------------------------------------------------------|-----------------|----------------------|------------------------------------------------------------------------------------------------------------------------------------------|
| Initial contribution                                 | £100,000.00     | C6                   | Quilter RAP-1080 formula                                                                                                                 |
| Value at the end of the period, no charges           | £105,000.00     | C6 + C23             | Quilter RAP-1080 formula                                                                                                                 |
| Return, no charges                                   | £5,000.00       | C23                  | Quilter RAP-1080 formula                                                                                                                 |
| Projected NET value at the end of the period         | £99,837.23      | C21 - C17 + C22      | Quilter RAP-1080 formula                                                                                                                 |
| <b>EFFECT OF THE CHARGES IN THE FIRST 12 MONTHS</b>  |                 |                      | Normally NEGATIVE in a first year: the charges are larger than one year's projected growth. This is the figure to explain to the client. |
|                                                      | <b>-£162.77</b> | <b>C29 - C26</b>     |                                                                                                                                          |
| <b>Projected growth rate after costs and charges</b> | <b>-0.16%</b>   | <b>C30 / C26</b>     | Against C7 before charges                                                                                                                |

| ASSUMPTIONS AND GOVERNANCE |                                                                                                                                                                                        |
|----------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1.                         | Replicates Quilter RAP-1080 (RAP/1080/0124 v1.1). The cells above hold live formulas: change an input and the whole disclosure recalculates.                                           |
| 2.                         | First 12 months only. Growth is applied to the amount left after the initial charges and is NOT compounded, exactly as the Quilter sheet does it.                                      |
| 3.                         | Adviser servicing is charged on the NET contribution after the initial charges, which is what the Quilter percentage sheet does. The monetary sheet instead takes the servicing amount |
| 4.                         | Fees must include VAT where applicable (Quilter's own note on the sheet).                                                                                                              |
| 5.                         | A real quote may use mixed growth rates. Where it does, use Quilter's weighted average calculator (RAP-0252) for the rate entered above.                                               |
| 6.                         | Indicative and NOT advice. The provider's own illustration governs: where the illustration and this calculation differ, use the illustration and record the difference as an item to   |
| 7.                         | Figures marked with a quotation in the Source column were read from the client's documents by The Advice Engine and confirmed by the adviser. The Advice Engine does not verify        |
